

# STOP® Safety Training Observation Program Overview

DuPont™ STOP® (Safety Training Observation Program) is a member of the DuPont Sustainable Solutions portfolio of workplace safety training offerings. The award-winning STOP® series provides a path to workplace safety excellence by making safe behavior and workplace conditions part of the work culture, thus preventing injuries and incidents.

STOP® programs use a combination of methods to give people the information, skills and willingness to work more safely, maximize their learning and apply what they learn to the real world. The programs feature a three-part approach:

- Individual self-study. Workbooks are used to introduce basic concepts and begin safety skill development.
- Field or application activities. STOP® program participants practice what they have learned in their own work areas.
- Group meetings. After viewing a video, participants discuss what they have learned and consider how it can be applied.

## Available STOP® Programs

### STOP® for Supervision

A comprehensive, behavior-based training program, STOP® for Supervision establishes the framework for the entire STOP® series. It teaches managers, supervisors and team leaders how to observe people as they work. By talking with people to acknowledge safe acts and correct unsafe acts, workers are encouraged to follow safe work practices. Oil and Gas version available.

### STOP® for Each Other

Focuses on peer-to-peer safety, teaching participants to interact with their coworkers, incorporate safety in their everyday activities and make safety second nature. Oil and Gas version available.

### STOP® for Healthcare

Deeply rooted in the idea that safe people equals safe patients. This program focuses on everyday safety by motivating staff to engage in peer-to-peer communication to enhance safe working conditions and safe actions around patients and each other.

## STOP® Safety Training Observation Program Overview

### STOP® for Ergonomics

Builds on the principles and skills introduced in the STOP® series and applies them to ergonomics, an essential component of workplace safety.

### STOP® for PSM

Provides employees a tool for process hazard awareness and risk reduction through observation. It provides organizations with a means to reduce hazards with immediate impact.

### STOP® Implementation Assistance Workshop

Conducted by DuPont™ STOP® experts before you begin STOP® implementation. Helps build a strong foundation for the STOP® program and increases involvement across your organization.

### STOP® Implementation Assessment

Reviews STOP® implementation at your site to assess the success of the implementation, identify gaps and recommend next steps for improvement in your safety observation program.

### STOP DataPro®

A web-based application that optimizes the value of STOP® programs by making it easier to record and analyze safety performance data and generate reports. It quickly and easily enables in-depth understanding of workplace safety using your STOP® observation data to review findings, identify trends, track corrective actions and monitor the frequency and effectiveness of safety observations. Now featuring a mobile app that can be used with iOS or Android devices.

For more than 30 years, DuPont™ STOP® has been helping businesses prevent injuries. Join the thousands of companies and government organizations worldwide who realize the benefits of this program as real dollars and cents. See for yourself how DuPont Sustainable Solutions is helping to provide people with the safest workplace possible.
